You Will Learn:

In the changing paradigm of our time there is a thrust toward extended consciousness. Even minimal effort to push back the barriers of perception makes possible dramatic new insights.

Regression and Reincarnation Therapy is an innovative and effective approach to help clients with difficult and perplexing problems through group interaction and participation. This workshop can help widen the scope of your expertise and knowledge. Regression therapy is based on the premise, that understanding the past can and does help clarify the present and build upon the future. The wisdom of the ancient tool of hypnosis can be utilised to help clients to experience, re-live, own, understand, dispel, integrate, or transmute the cognitive-emotional and psycho-energetic fields involved.

Is there a future in the past?

Course Content:

- Basic Concepts and methods of multidimensional therapy
